WORK EXPERIENCE

Customer Service Officer / Chat Agent | 2025–2026
Traydah Global Resources (Fintech)

- Supported customers across live chat, email, and phone with transaction, account activity, and platform-use inquiries, achieving over 90% first-contact resolution.
- Verified transaction details, customer information, and system inputs carefully to maintain data accuracy and reduce processing errors.
- Investigated customer complaints and service issues, communicated next steps clearly, and escalated cases to internal teams when needed.
- Collaborated with internal teams to resolve escalations and improve turnaround time for customer requests.
- Updated customer records, tracked service metrics, and prepared reports to support operational workflows.

Customer Service / Virtual Assistant | 2024
The Proxy Academy (Edtech Academy)

- Resolved user questions and technical issues through Zendesk, WhatsApp, and phone support, achieving a 70%+ first-contact resolution rate.
- Provided step-by-step guidance to help users navigate digital platforms and complete tasks.
- Maintained cloud-based work tools, including Google Drive, Trello, and Notion, for task tracking and coordination.
- Created process documentation and reusable templates that reduced administrative workload and improved response time by 25%.
- Managed email correspondence, scheduling, and digital files while meeting deadlines in a fast-paced environment.

Customer Support / EdTech Consultant | 2022
Evans Publishers

- Provided technical support to school users through WhatsApp and phone, resolving issues with education software.
- Guided school administrators and educators through grading, class timetable, and attendance features.
- Conducted user training, product walkthroughs, and onboarding to support smooth platform adoption.
- Entered and maintained student, staff, and academic records with attention to accuracy and data integrity.
- Coordinated client requirements with product and support teams and helped troubleshoot implementation issues.

TECHNICAL PROJECT

Windows IT Support Troubleshooting Lab

- Documented four Windows support exercises covering network connectivity, DNS resolution, network adapter/IP configuration, and system/process inspection.
- Practised commands including ipconfig, ping, nslookup, netsh wlan show interfaces, systeminfo, and tasklist; recorded findings and limitations in case studies.
